

WAFA Multipurpose Management Software & Website

Project Requirements & Scope

1. Project Overview

WAFA Multipurpose Management Software & Website will be a secure online platform designed to manage organizational activities, members, accounting, notifications, certificates, meetings, and website content from one centralized system.

The system will include an **Admin Panel**, **Member Panel**, **Accounting Module**, **Notification System**, and a **public website**.

2. User Roles

Super Admin (S.Admin)

Full control over the system, including users, roles, accounting settings, website content, notifications, and system management.

Admin

Can manage users, certificates, meetings, links, notifications, and other assigned administrative tasks.

Accountant

Can manage authorized financial records, including income, expenses, transactions, and accounting reports.

Member

Can access their own information, certificates, assigned links, meetings, and notifications.

3. Main Features

User Management

- Create and manage user accounts.
- Assign roles and access permissions.
- Activate or deactivate accounts.

Certificate Management

- Upload and assign certificates to members.
- Allow members to securely access their certificates.

Link Management

- Add useful or organization-related links.
- Share links with selected members or groups.

Meeting Management

- Create and manage meetings.
- Add meeting dates, times, descriptions, and joining links.

Notifications

- Send important announcements through the system.
- Send important notifications through email.

Accounting

- Manage income and expenses.
- Record and manage financial transactions.
- View basic accounting records and reports.
- Control financial access based on user roles.

Website Management

- Update selected website content from the admin panel.
- Manage organization information, announcements, contact details, and approved content sections.

4. Email Service

The system will include email functionality using **Resend**.

- Up to **3,000 emails per month** will be included in the base package.
- Additional email capacity can be added when required.
- Higher email limits will be available with **additional charges**.

Email may be used for important notifications, meetings, certificates, account-related messages, and other organizational communication.

5. Storage

The system will include a minimum of **10 GB storage** for:

- Certificates and documents.
- Profile images.
- Organization files.
- Other approved media and resources.

Additional storage can be added in the future if required.

6. Domain & Hosting

The base package will include:

- **One .com.np domain free of charge**, subject to domain availability and registration requirements.
- Production hosting for the website and system.

- Secure website access with HTTPS.
- Database and file storage setup.
- Basic monitoring and backup support.

7. Security & Access

The system will be designed to protect organizational and member information.

Key security requirements include:

- Secure login and account access.
- Role-based access control.
- Protected personal and financial information.
- Secure document access.
- Password protection.
- Activity and important action records.
- Regular backup and recovery support.

Each user will only be able to access information and features allowed for their role.

8. Scalability

The system will initially support the organization's current needs and approximately **25–30 users**.

The platform should allow future expansion, including:

- More users.
- Additional storage.
- Higher email limits.
- Additional accounting features.
- New modules and features.

9. Final Deliverables

The completed WAFA system will include:

- Admin Panel.
- Member Panel.
- Four user roles: **Super Admin, Admin, Accountant, and Member**.
- User and role management.
- Certificate management.
- Link and meeting management.
- Notification system.
- Email integration.

- Accounting module.
- Website content management.
- Minimum 10 GB storage.
- Up to 3,000 emails per month included.
- Expandable email capacity with additional charges.
- One free .com.np domain, subject to registration requirements.
- Production hosting and deployment.
- Secure access and role-based permissions.
- Backup and monitoring support.

10. Summary

The WAFA Multipurpose Management Software & Website will provide a professional, secure, and easy-to-manage platform for handling the organization's members, financial records, communication, documents, and website content from one centralized system.

The system will be built to support future growth and additional features as the organization's requirements expand.
